Flood your home in light

Choosing the right roof lantern for your home is an important decision. They should let in the maximum amount of light, yet keep heat in your home and would be intruders out. We have designed the S1 aluminium roof lantern from the ground up to meet your every need.

Thermlock® multi-chamber thermal technology helps keep heating bills low, while ultra low line aesthetics give a stylish architectural appearance, and security is built into every S1 lantern, helping protect you and your home.

Secure,
sustainable and
stylish, the UK's
most secure roof
lantern.

S1 is available exclusively with optional SheerVent® roof ventilation, which can be automated and linked to rain sensors.

See page 14 for more information.

Sheerline's S1 is already one of the most secure roof lanterns in the UK and now comes with an enhanced security upgrade option.

This includes security clamping plates that lock laminated glass panels in place, preventing them from being lifted and removed by would-be intruders.

These stainless steel components are held firmly in place by stainless steel security screws for added strength.

This optional security upgrade is invisible on finished roofs and doesn't compromise the stylish design or thermal performance that Sheerline products are known for.

The UK's most secure lantern, keeps you and your home safe

The innovative construction of the S1 system eliminates the security weaknesses of traditional lantern designs. Features such as anti-tamper screws, enclosed anti-tamper glazing, security tape and our patented glass lock, alongside our unique high security ridge end, ensure there isn't an easy way

to enter your property via your flat roof lantern. All of these innovative features combined make Sheerline's S1 system the UK's most secure aluminium lantern roof*.

So if you are looking for a lantern that comes with extra peace of mind as standard – then we have you covered.

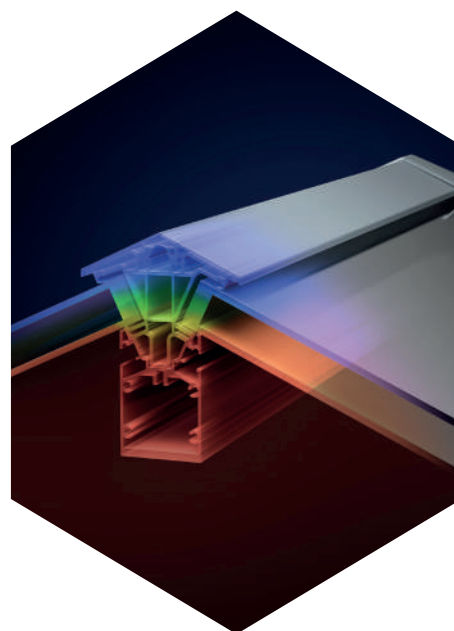

**Mainstream residential roof lantern - not utilising bonded glass*

Whatever the weather Thermlock® technology keeps you comfortable and heating bills lower

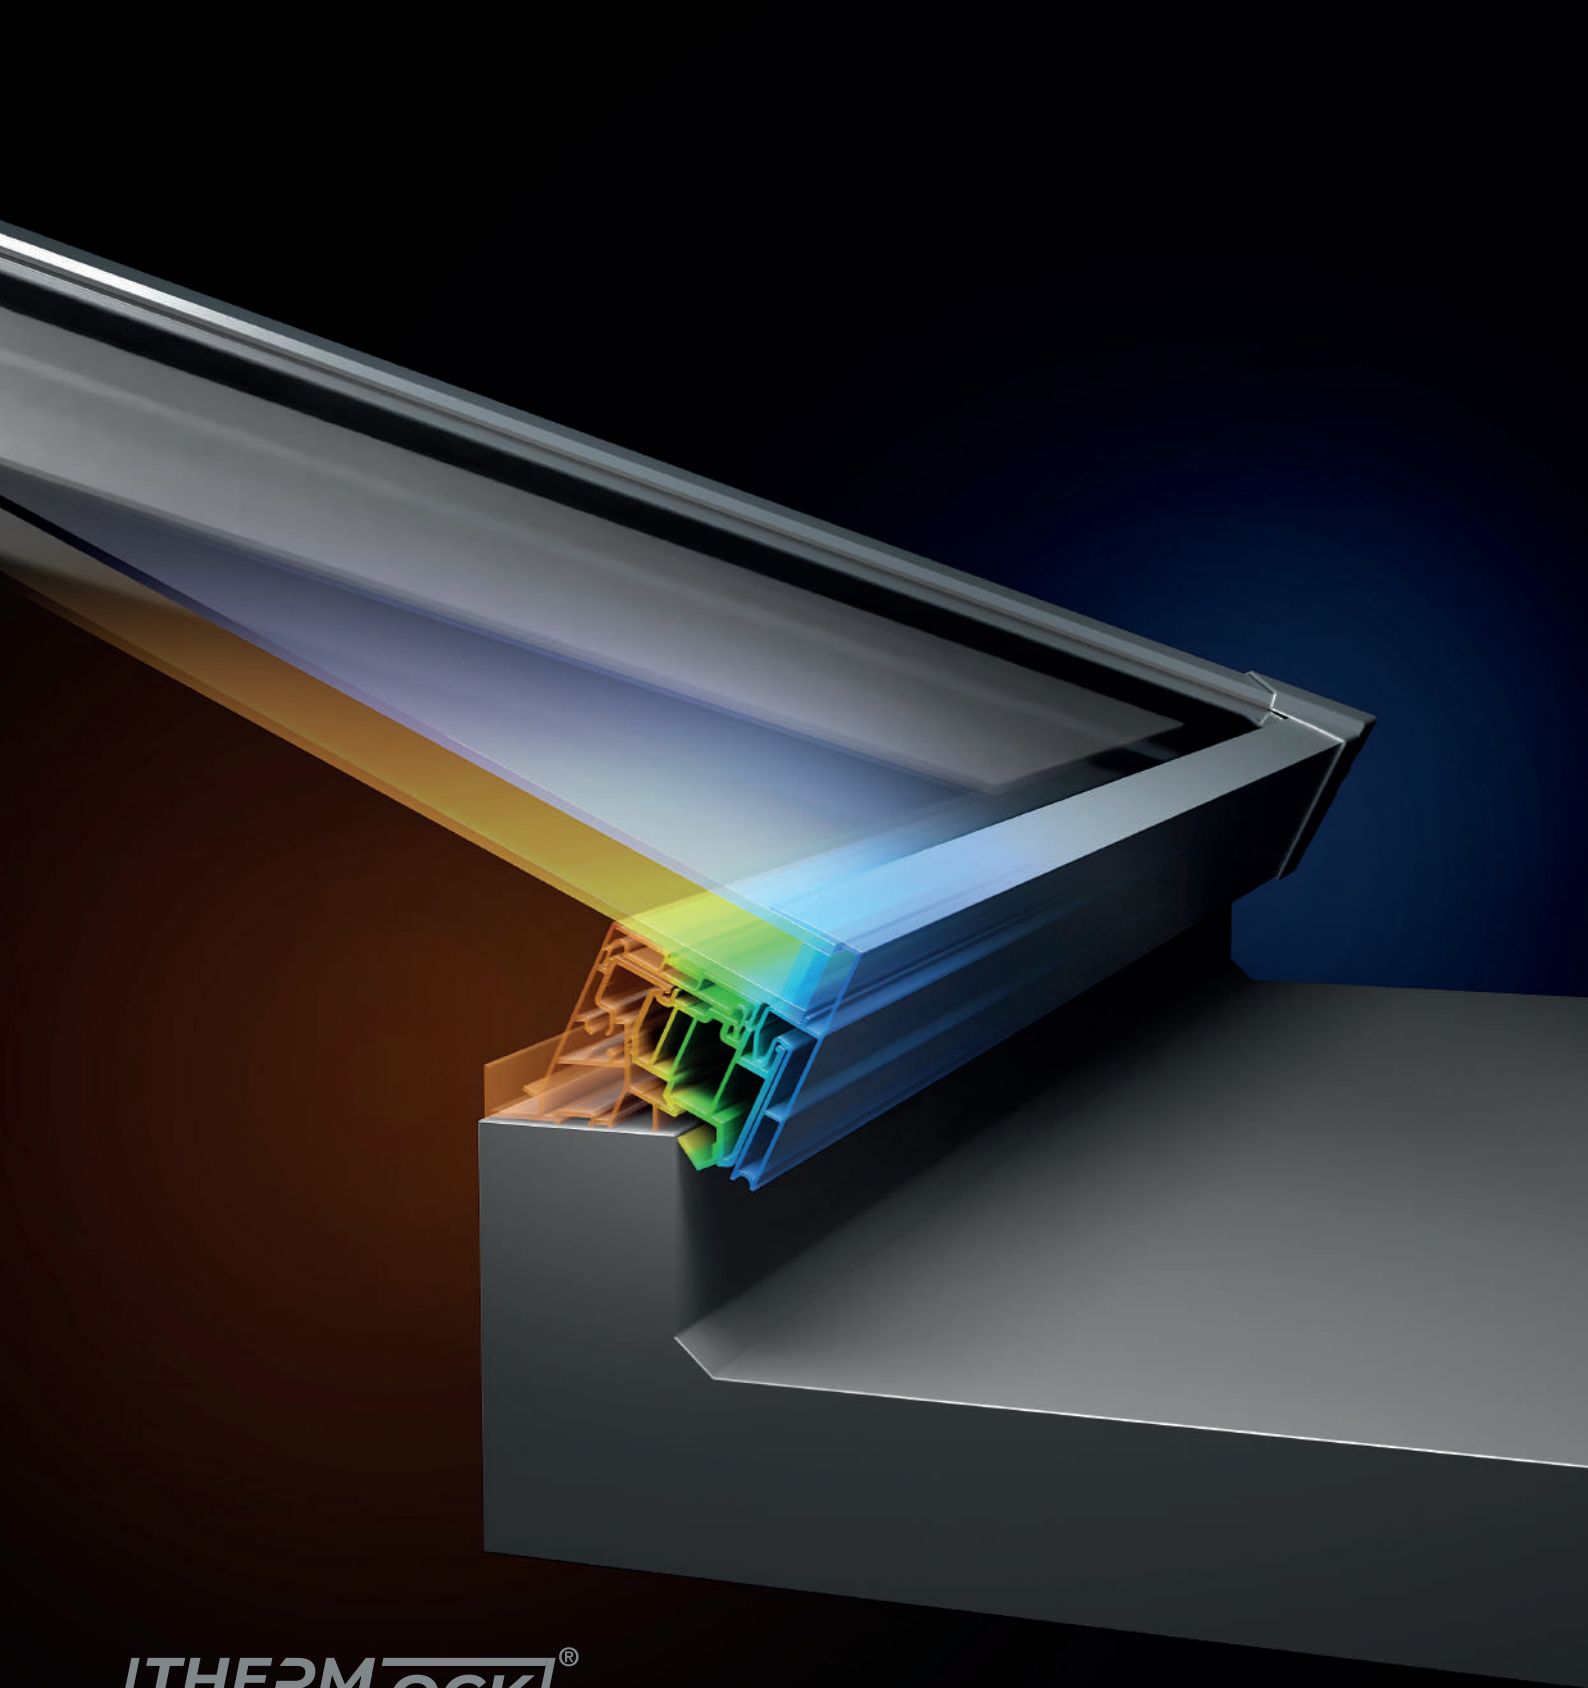

The S1 lantern offers exceptional thermal performance thanks to our innovative Thermlock® technology. Especially when it is paired with high performance 28mm glazing. A unique co-extruded perimeter seal also ensures draughts and rain are kept out. 28mm glazing allows acoustic dampening glass to be fitted if required.

28mm glazing
1.0 U-value
W/(m²K) centre pane*

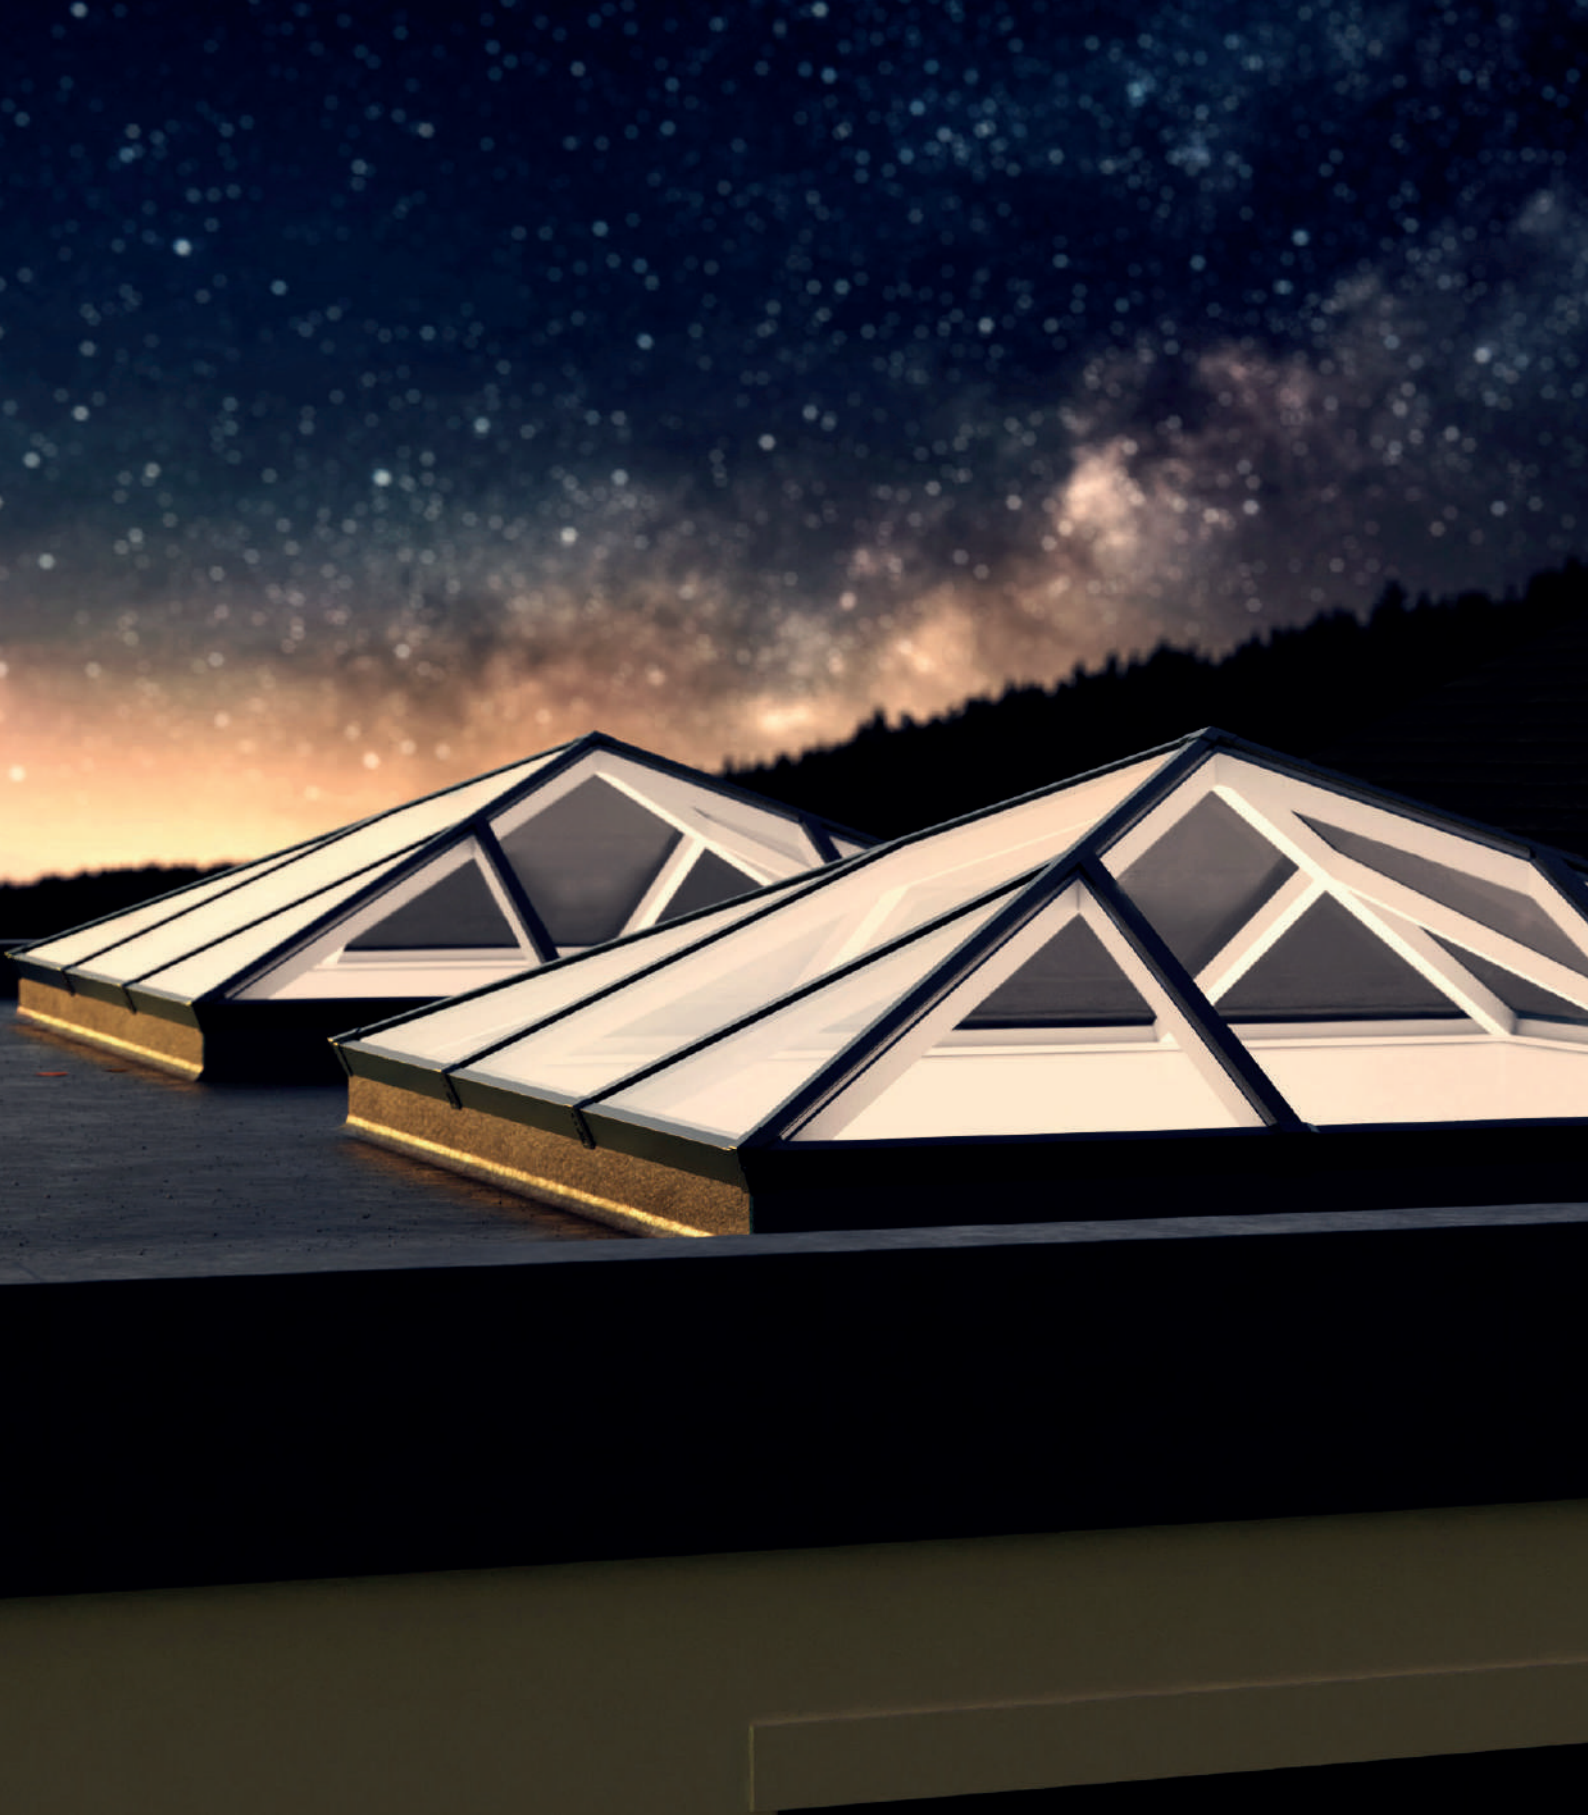

Thermal transmittance, also known as a U-value, measures the rate of transfer of heat. The better-insulated a product is, the lower the U-value will be.

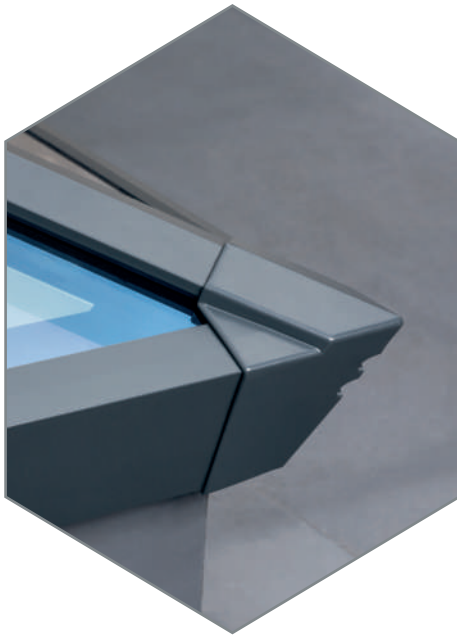

**Subject to glass specification*

THERMLOCK[®] technology inside

Great looks from every angle

Slim, consistent 50mm rafter, hip and ridge sightlines maximise the light flooding into your home, creating bright, airy interiors and banishing gloom.

The S1 lantern features ultra low line aesthetics so rafter and hip top caps sit close to the glazing level on the exterior, creating a sleek modern look.

Completing this refined architectural appearance our corner and rafter end caps run perfectly in line with the perimeter of the lantern, so no unsightly angles jut out.

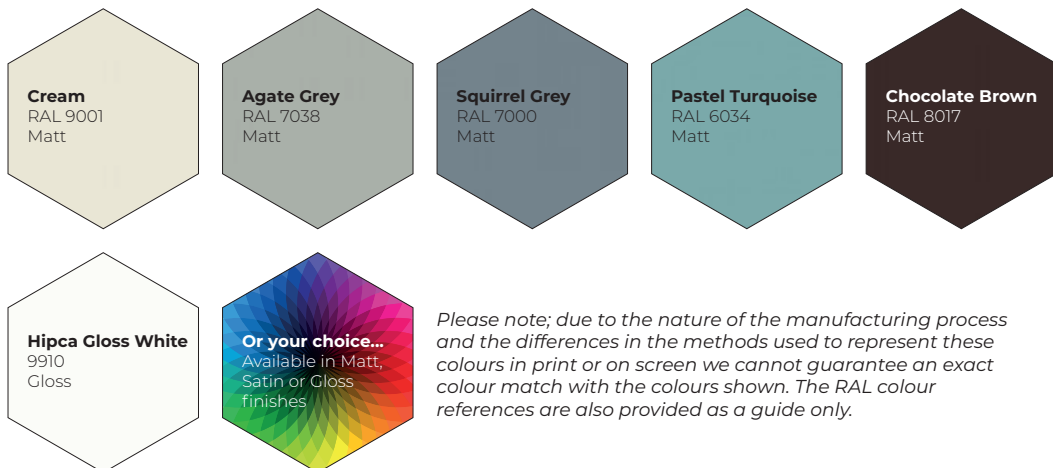

All available in a range of colours

Sheerline lanterns are available in three standard powder coated colours, with the option of choosing a different colour for the interior. Bespoke colours can also be ordered.

STANDARD LANTERN COLOURS

BESPOKE LANTERN COLOUR EXAMPLES

Please note; due to the nature of the manufacturing process and the differences in the methods used to represent these colours in print or on screen we cannot guarantee an exact colour match with the colours shown. The RAL colour references are also provided as a guide only.

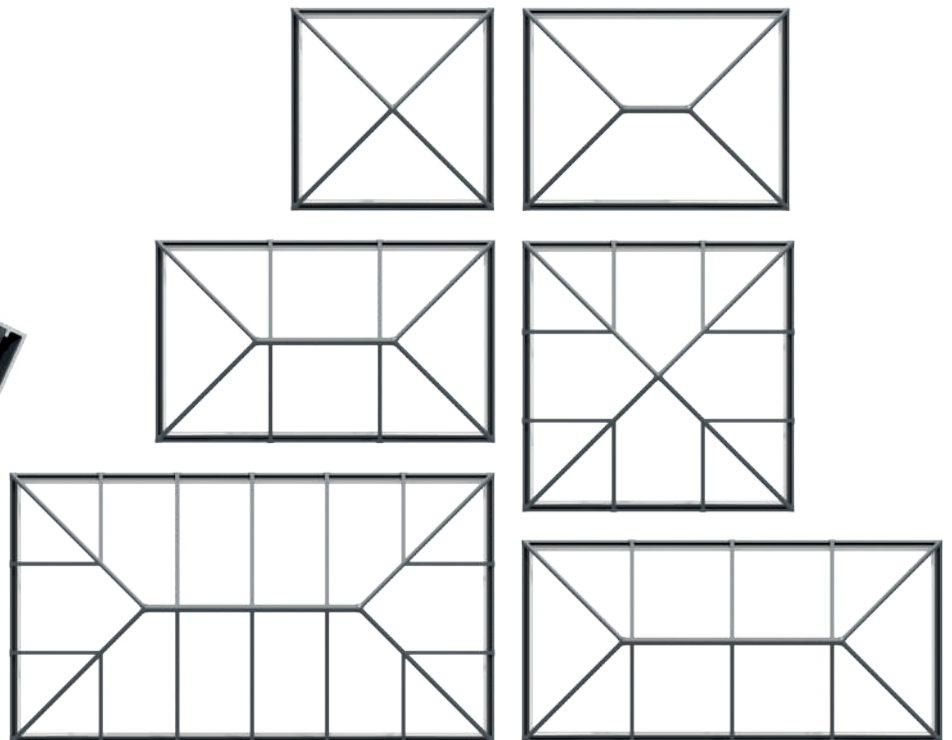

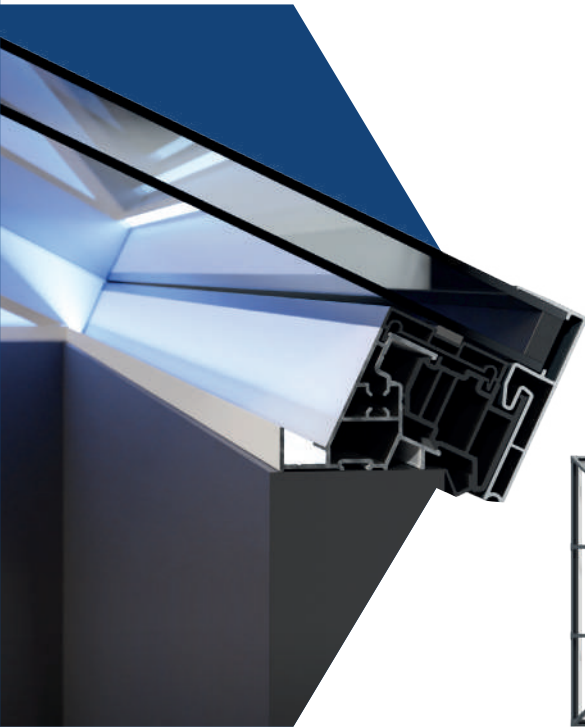

A wide range of styles and sizes

Sheerline aluminium roof lanterns are available in a choice of 13 styles from square 'pyramid' designs to grander options suitable for larger 'orangery' style installations.

Maximum sizes up to 3.2m by an impressive 6m long, all set at a 25° pitch and all weather rated for the whole of the UK*.

Our 3 way option allows for bigger spans to be catered for without the need for jack rafters.

SI lanterns also feature an integral LED light channel around the perimeter of the roof allowing you to add mood lighting and create the final touch of individuality for your interior.

**Rated for a snow load of 1.2 kN/m². Covering the whole of the UK up to 200m altitude.*

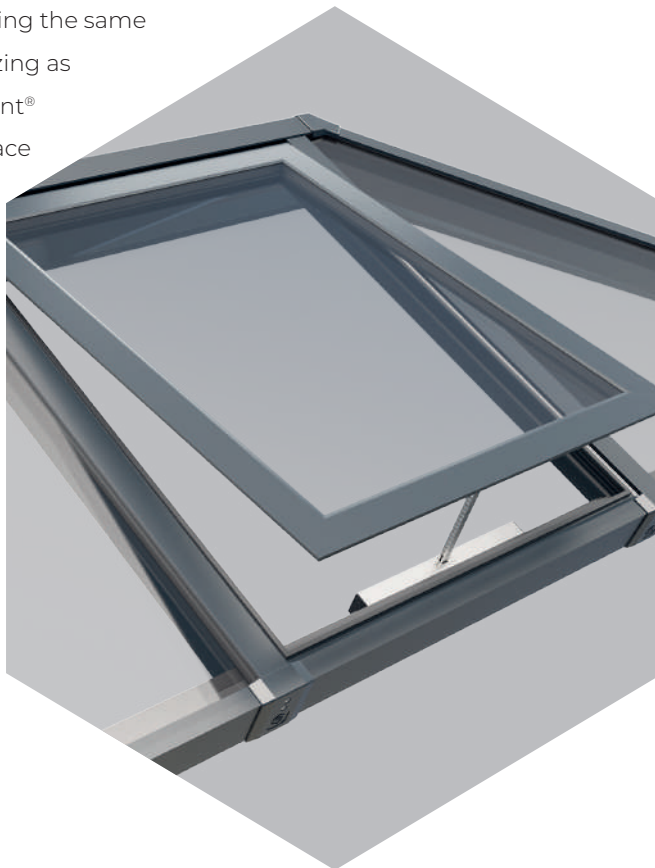

SHEERVENT[®]

Flush Intelligent Ventilation

With a sleek minimalist design that sits perfectly flush with S1's discreet rafter bars and powered actuators that are intelligently automated, Sheerline has reimagined roof vents, bringing them into the 21st century at last. Dispensing with the need for muntin bars, which are prone to issues, SheerVent[®] offers reliable ventilation without the risk of leaks.

Fully thermally broken and using the same high-performance 28mm glazing as the rest of the S1 roof, SheerVent[®] easily ventilates your living space to prevent excessive heat build up.

An optional rain sensor can automate the closing of your roof vent for added peace of mind.

All created from one of the most sustainable materials on the planet

Made from the most recycled and abundant metal in the Earth's crust and produced in the most energy efficient aluminium window facility in the UK, all Sheerline products are manufactured in the most sustainable way possible. Our state-of-the-art, energy efficient SMS HYBEX press delivers energy savings of up to 55% compared to

traditional presses. The design of our systems also vastly reduces fabrication waste, minimising the unnecessary consumption of raw material and helping reduce your home's carbon footprint. This coupled to the high level of energy efficiency built into every product helps build towards a greener future for all.

75%

Did you know 75% of the aluminium produced is still in use, thanks to its durability and highly efficient recycling processes.

Proudly designed and manufactured in the heart of the UK

We are on a mission to transform what customers expect from aluminium windows, doors and lanterns. From design and testing, to the manufacture of every major component at our state-of-the-art facilities, we are passionate about each element that goes into producing every Sheerline product. Delivering a range of high quality products that operate, perform and look exceptional, keeping you warm and secure for many years to come.
